DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121 and 372:

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

- I. Claims 1-8, 12-14, drawn to multiplex communications combining or distributing information via code word channels using multiple access techniques, classified in class 370, subclass 335.
- II. Claims 9-11, 15-16, drawn to pulse or digital communications spread spectrum correlation-type receiver, classified in class 375, subclass 150.
- III. Claims 17-22, drawn to multiplex communications communication techniques for information carried in plural channels via code word channels, classified in class 370, subclass 479.

Art Unit: 2664

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Claims 1-16 have been cancelled.

2. Newly submitted claims 17-22 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: The newly submitted claims pertain to a base station using a code associated with a preamble wherein the original claim set 1-16 pertain to a method for non-coherently coding and detecting a preamble signature.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 17-22 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

The amendment filed on 10/24/2005 canceling all claims drawn to the elected invention and presenting only claims drawn to a non-elected invention is non-responsive (MPEP § 821.03). The remaining claims are not readable on the elected invention because the claims pertain to a base station using a code associated with a preamble wherein the original claim set 1-16 pertain to a method for non-coherently coding and detecting a preamble signature.

Since the above-mentioned amendment appears to be a *bona fide* attempt to reply, applicant is given a TIME PERIOD of ONE (1) MONTH or THIRTY (30) DAYS, whichever is longer, from the mailing date of this notice within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD UNDER 37 CFR 1.136(a) ARE AVAILABLE.
